

History:

Since 1982, the women and men of On-Target Supplies & Logistics have developed a solid reputation as leaders in community service. We're proud of our history of working with sincere individuals, non-profit organizations and caring corporations to help individuals, families and neighborhoods. We have made positive contributions in the areas of healthcare, education, economic development and many other important fields of service. From the very beginning our business strategy has been about improving peoples lives. Now is the time for even greater focus. **OTSL Charities♥** is the way!

You can make a big difference by joining your colleagues in supporting **OTSL Charities♥** with volunteer time, and a commitment to make a very small financial contribution. Both will be appreciated and managed carefully. Together, we can continue building a better supply and logistics management firm that is concerned about our community because of our compassion for people.

Mission: To coordinate the volunteerism and contributions of On-Target Supplies & Logistics. The financial generosity of the company's employees is leveraged with matching funds. Such cooperation will optimize our ability to improve designated communities and support selected initiatives.
